

HARVEY VOGEL MANUFACTURING CO.

Custom Metal Stampings and Assemblies

Transportation

Move forward with high-quality metal stampings and fabrications

Harvey Vogel's experience in the transportation sector includes components and assemblies used in automotive, trucking, and recreational vehicles. This includes motorcycles, off road vehicles, snowmobiles and water craft. These product requirements include precision and appearance, while ensuring they are robust to perform in challenging environments.

Prototype to Production

From revolutionary products to improving your supply chain for high-quality stampings, Harvey Vogel meets your needs. Our experience covers all phases of manufacturing from product development through production.

Our Transportation Experience

Harvey Vogel is a leader in the manufacturing of stampings and assemblies for the transportation market. Harvey Vogel components are used in key functional areas in engine, exhaust, gear shifts, brake discs and turbo systems. HV also manufactures highly aesthetic side view mirrors as well as pedal guards and various electronic systems from seat warmers to safety devices.
